PEST SERVICES

**EFFECTIVE PEST
MANAGEMENT IS A
CRITICAL COMPONENT
OF FOOD SAFETY.**

COMMERCIAL FOOD PROCESSING PEST SOLUTIONS

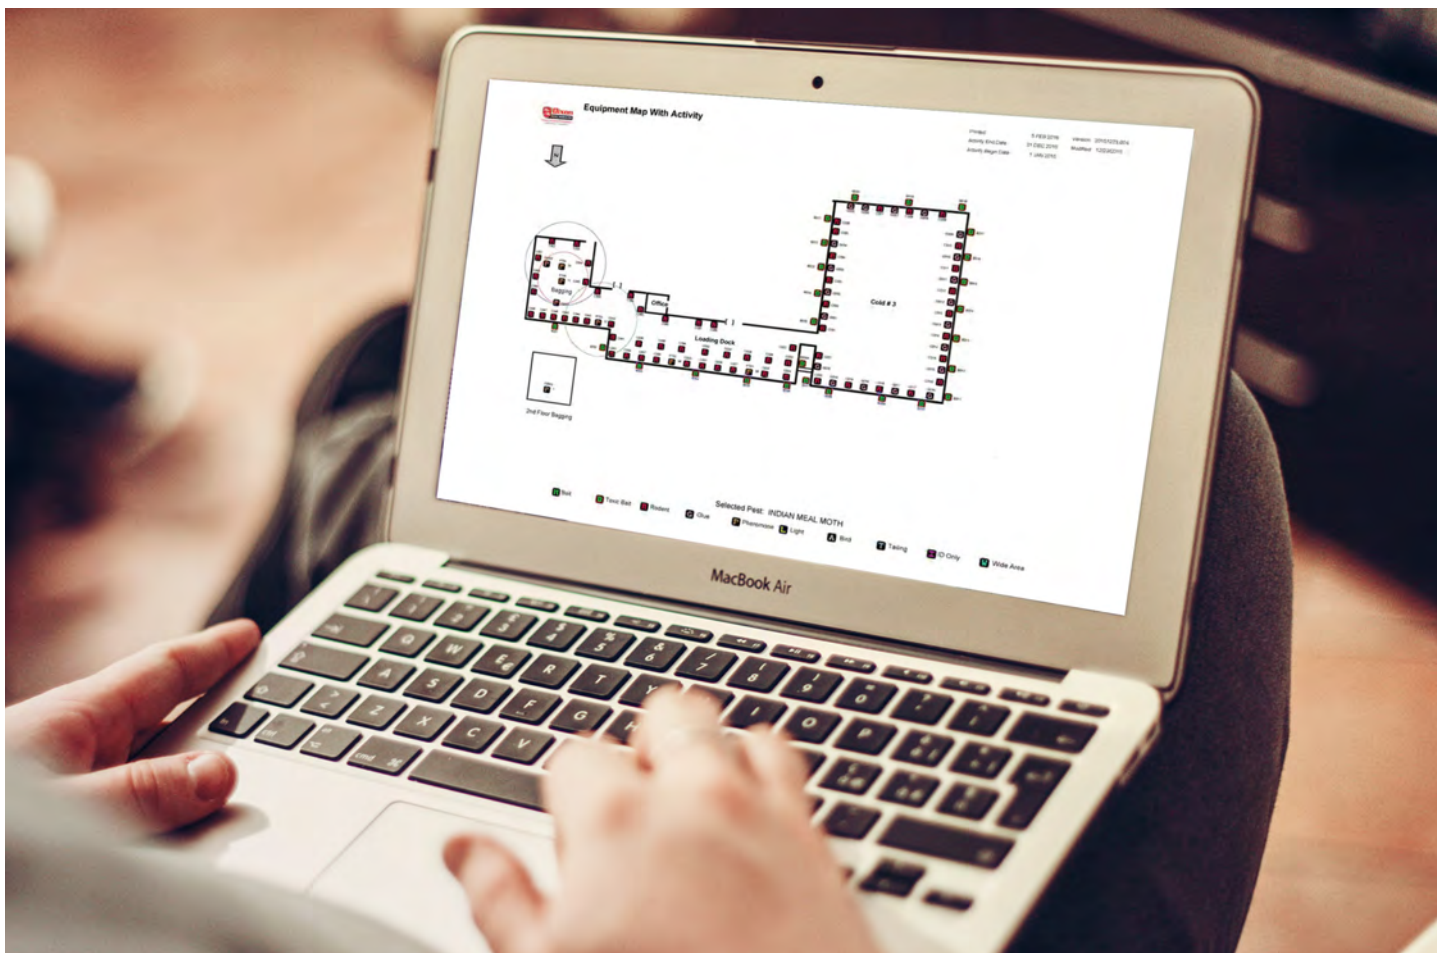

Food safety is serious business, and effective pest management is a critical component of food safety. Our experience providing commercial food processing pest management solutions and our credentials are second to none:

- Commercial-dedicated technicians who are trained in audit-ready pest programs including BRC and SQF, and all third party and customer audit protocols.
- On-premises management quality assurance assessment tailored to your needs
- Up-to-date on FSMA standards, including GMPs, HACCPs and HARPCs as they relate to proactive pest management
- State-of-the-art electronic reporting, service verification, and record-keeping
- Close connections to food industry experts; therefore continual audit requirement updates for you
- Continuing education of our commercial pest services technicians to assure you of cutting-edge pest solutions
- 100% focused on safety - inside and outside of your facility.

We believe that your pest management provider should function as your partner in protecting your facility, your brand, your clients and patients. At **Dixon Pest Services**, we take very seriously the role we play in our customers' success, and we are privileged to count among our clients some of the area's most recognizable facilities.

We welcome the opportunity to discuss our qualifications and provide a demonstration of our capabilities. Ask us about our no cost-no obligation initial system assessment.

ELECTRONIC REPORTING CAPABILITIES

State-of-the-art bar-coding is an important element in our commercial pest management services and key to proactively providing peace of mind protection to **Dixon Pest Services'** commercial clients.

Three of our electronic reports, day-of-service report, matrix trends report, and inspection notes report stand out as the most popular among our commercial customers; but the full range of our reporting capabilities will satisfy any need that may ever arise. Following is a partial overview of our available reporting categories:

- Applications
- Device Baits
- Environmental Issues
- Graphs
- Pest Activity
- Pest Evidence
- Service

For example, all reports can be sorted as needed by: Date, Area, Style, Device Type, Selected Pesticide or Rodenticide and Specific Location.

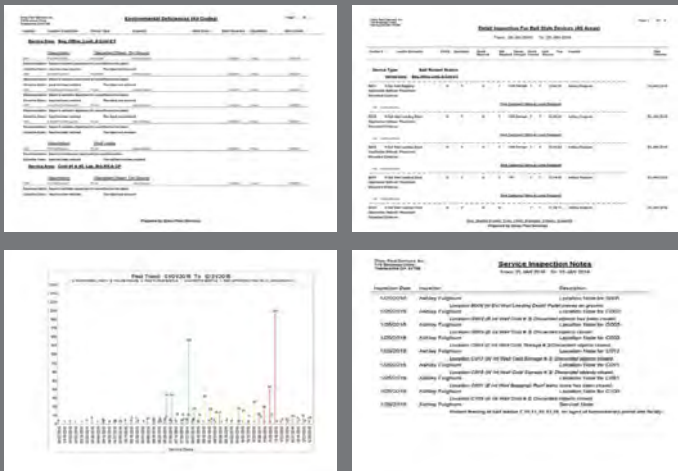

In addition to reporting, graphing is also provided: by Pest, by Evidence, by Environmental Deficiencies, by Rodenticide Usage, by Activity, and by Pest Trends.

We would welcome the opportunity to provide you with a demonstration of our electronic reporting capabilities.
